

**Bare Shaft screw compressor block Aerzener /Sabroe VMY346 NR**

**Year of built : 2001**

**Complete overhauled in 2017**

**Zero running hours after overhaul**

**Description :**

The VMY346NR is produced by the well know German compressor manufacturer German Aerzener Maschinenfabrik in Aerzen. The VMY compressor range is used for many years on the well-known Sabroe VMY units. Later on, for a long period of time it was used on the Compressor of the well-known compressor unit builder HAFI. The construction is based on top- segment of refrigeration/ gas compression, due to journal bearing / thrust bearing construction. Typical design on Aerzener compressors is the full flow oil pump direct on the compressor – this compressor is complete with oil pump and ready for replacement/ spare compressor for your equipment.

**Details of the compressor block:**

Model VMY346 NR ( Neben Rotor driven) has a swept volume at 50 Hz ( 2950 RPM) of 2708 m3/hr. The compressor block is built in 2001. The last year this compressor was a spare –compressor for a costumer who has several similar models running.

This bare –shaft compressor block was in 07/2017 complete overhauled by a company I know very well : Arctos . This company is well – known for his maintenance , experience and quality of this overhauls for compressor blocks.
